Foreword

I co-founded this partnership with Leanna Wright, together we have a combined experience of over 50 years, we have consulted with business in many guises and many jurisdictions, at all levels and in regulated environments. We both felt that We could offer a superior one stop service in Morocco, currently an underserved market...

Our day-to-day work with our clients is always varied but certain themes and values run through everything we do.

These are the things that set us apart:

Our main focus has always been on building truly long-term relationships and establishing long-term planning This helps bring success for our clients' and also for us as a business.

It may sound obvious, but close examination and due diligence is a vital part of what we do. As a result, we have sidestepped all of the 'toxic' product problems of recent years, applying three things: expert analysis, common sense and a healthy dose of Professionalism. Most of all, underlying everything we do, with clients and in our business decisions, is how we see ourselves: the word 'intermediary' implies a neutral position between two parties. However, we aren't neutral. Whilst behaving ethically to all parties, we remember that our job is to be always on your side. And ,We aim to add value to our client relationships by ensuring that you receive the very best planning and independent advice.

Welcome to our Firm, we look forward to helping you.

"Mickey has provided excellent, down to earth, real world advice to myself and my wife Sophie He has taken the time to understand our longer term aspirations and has led us in the development of a plan that focuses on the long term rather than just the next few years. He has used his knowledge and practical view of the world to change our perspective on financial planning and had provided some smart thinking along the way."
